

BELGIO Marche En Famenne «The space of encounters»

Site

A very narrow lot, with some unusual topography, placed in between the medieval core of the city, and newer areas, bordering a major circulation axis.

Project

A reconciliation between the medieval tissue and the contemporary one, with a permeable building front thus transforming a passage, and a limit in “place”. A place at the scale of the city, a space of meeting, of human contacts, of interactions: “The space of encounters”.
